

Libreoffice Document

Number: Test123

Date : 24 February 2021

something: about I don't know

For: all users in the future

hopefully

not: forever

It is possible to work with this document in

Version: 6.3.5.2

Build-ID: dd0751754f11728f69b42ee2af66670068624673

CPU-Threads: 4; BS: Linux 3.16; UI-Render: Standard; VCL: gtk2;

Gebietsschema: de-DE (de_DE.UTF-8); UI-Sprache: de-DE

Calc: CL

But in **Libreoffice 7** this document needs very long to open and it is impossible to work with it, because Libreoffice is not reacting somehow! :-(
So where is the improvement?
