

In Word, the Body text can start ABOVE the header.

In LibreOffice, I don't think that is possible.

That should cause some troubles.

Something

The header is lost in the background.

That should cause some troubles.

Something

The header is lost in the background.

That should cause some troubles.

Something

The header is lost in the background.

That should cause some troubles.

Something

The header is lost in the background.

That should cause some troubles.

Something

The header is lost in the background.

That should cause some troubles.

Something

Tiny header
