

## Step 1

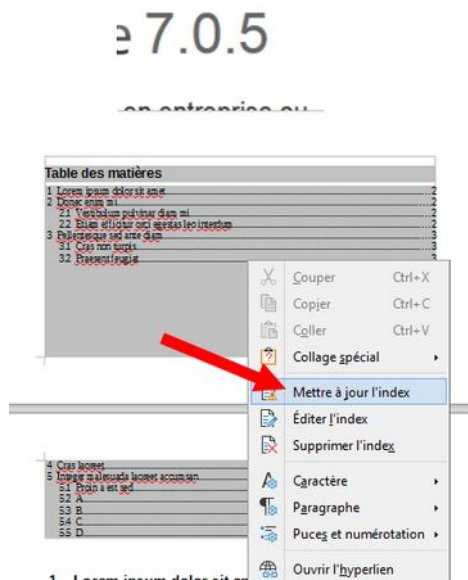

I open the EXAMPLE 2 provided in <https://bugs.documentfoundation.org/attachment.cgi?id=170603>

The table is splitted (but it does not need to).

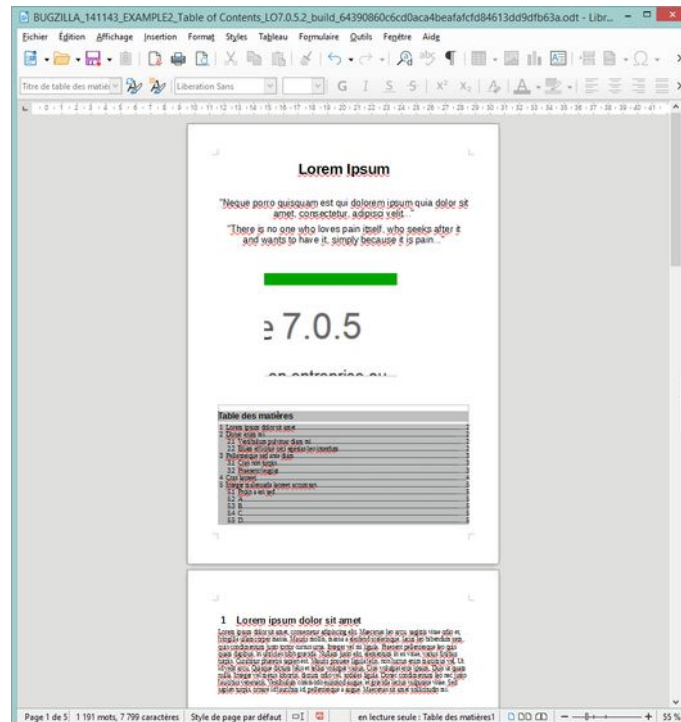

## Step 2

I just **refresh** the table (I mean : I do not modify anything else, i.e. I do not remove the image)

⇒ The table is not splitted now (it can be entirely contained in the first page) :

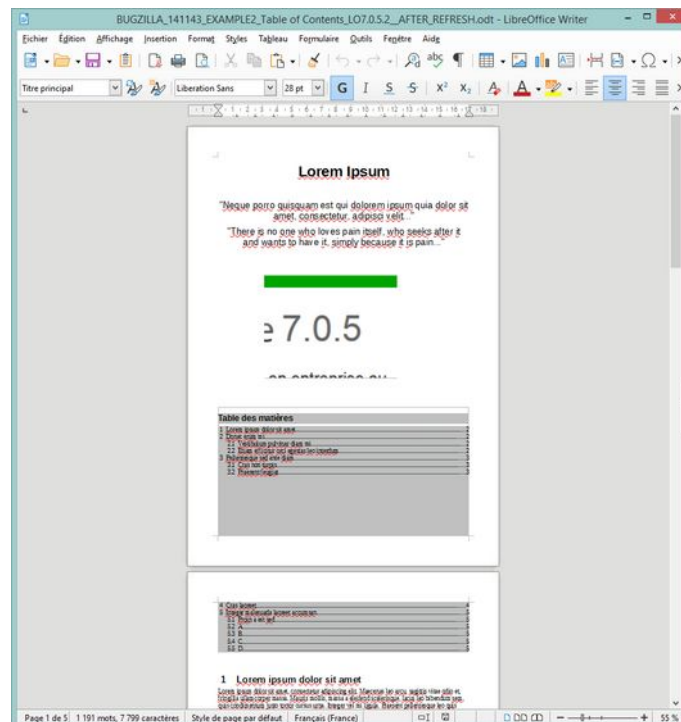

## Step 3

I save and close the document (with the same name or a new name).

## Step 4

I open it again : unfortunately the table is splitted again...
