Port count: 57856 <https://www.FreshPorts.org/categories.php>
New ports: 5 <https://www.FreshPorts.org/ports-new.php?interval=today>

emulators/virtualbox-ose
Mk/**tex.mk: Convert bsd.tex.mk to USES=tex

- Update all the consumers to use USES=tex
- USE_TEX=yes is the old way of writing USES=tex which has been removed and replaced in all ports
- Almost all of the USE_TEX features remains unchanged
- Some consumers had the same variables defined both in the mk infrastructure and also in the ports which have been removed from the ports as those are redundant.

In case any of the consumers are failing to build please make sure that the necessary USES=tex is there. Unlike previous USE_TEX=yes will no longer load the required VARS for tex and related dependencies.

emulators/virtualbox-ose: fix builds on CURRENT

SAVENAME was retired by D36542 <https://reviews.freebsd.org/D36542>

Bug 267079 https://bugs.freebsd.org/bugzilla/show_bug.cgi?id=267079
involves failures to build four ports, for VirtualBox guest additions, on FreeBSD-CURRENT:

emulators/virtualbox-ose-additions
emulators/virtualbox-ose-additions-legacy
emulators/virtualbox-ose-additions-nox11
emulators/virtualbox-ose-additions-nox11-legacy

Fix bug 267079 for CURRENT 1400068 and greater by hiding the use of SAVENAME in patch-src_VBox_Additions_freebsd_vboxvfs_vboxvfs__vnops.c for:

emulators/virtualbox-ose
emulators/virtualbox-ose-legacy
