

1. Open new text document.
2. Format > Page > Text Grid
3. Select "Grid(linex and characters)".
4. Set some number to "Max . base text size".
5. The maximum value of the "Lines per page" to change depending on the value of "Max. Base text size".
6. However, the maximum value of the "Characters per line" does not change.

Initial settings in the 'Text Grid' dialog box:

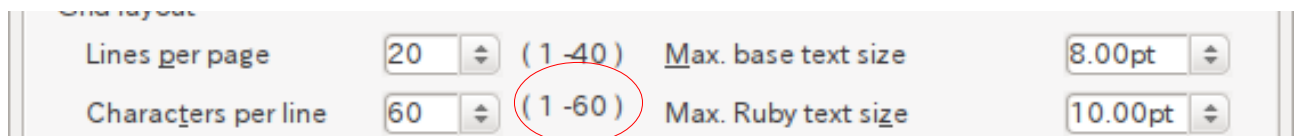

Lines per page	20	(1 -24)	Max. base text size	20.00pt
Characters per line	24	(1 -24)	Max. Ruby text size	10.00pt

Settings after changing 'Max. base text size' to 8.00pt:

Lines per page	20	(1 -40)	Max. base text size	8.00pt
Characters per line	24	(1 -24)	Max. Ruby text size	10.00pt

7. Close the dialog by clicking "OK".
8. Format > Page > Text Grid
9. the maximum value of the "characters per line" will change.

Settings after reopening the dialog box:

Lines per page	20	(1 -40)	Max. base text size	8.00pt
Characters per line	60	(1 -60)	Max. Ruby text size	10.00pt
