

Transparent Text EPS Image

That is a transparent EPS file on a green background. It renders poorly on LibreOffice on the screen, appearing as if it had a white background. However, it fails to render as transparent when you select Export as PDF with no special options

In fact the text fails to render as well so PDF Export is completely broken.

Tested using LibreOffice Version: 4.1.3.2 on Mavericks 10.9.0 (with MacPorts and pstoeedit installed and available on the path).

Build ID: 70feb7d99726f064edab4605a8ab840c50ec57a

Above is the same image rendered as SVG and imported, also configured with a green background
